SUMMARY

I am an IT Developer with over 4 years of experience delivering high-performance web and mobile applications. I specialize in designing scalable architectures, optimizing system performance, and creating seamless, user-centric experiences. I have a proven ability to translate complex requirements into efficient, maintainable, and reliable solutions, and I thrive in both independent and collaborative environments.

PROFESSIONAL EXPERIENCE

IT Developer - PT Easysoft Indonesia **June, 2023 – Present**

- **Nexilis.io** - Nexilis.io is a web-based portal where I served as a Fullstack Developer. I developed the frontend using HTML, JavaScript, jQuery, and Bootstrap, while the backend was built with native PHP. PostgreSQL was used as the database system.
- **OneApp** - OneApp is a social media application similar to Instagram, providing features such as content posting, messaging, and voice/video calls. I worked as a Fullstack Developer, utilizing React, TypeScript, Vite, and Bootstrap for the frontend, and native PHP for the backend, with MySQL as the database.
- **Securemap** - SecureMap is a real-time tactical unit tracking application built with React, TypeScript, Vite, and Bootstrap for the frontend, leveraging the Google Maps API for interactive mapping. The backend is implemented as a custom REST API that manages unit locations, marker categorization, user workflows, and point data with a 5-second polling interval. The system uses MySQL as the database and integrates with an Android bridge to support mobile communication features such as live streaming and push-to-talk.
- **Crypto App (Virtoo)** - Virtoo is a cryptocurrency trading platform designed to provide a simple and transparent user experience. It features a modern interface focused on portfolio tracking and digital asset price visualization. I worked as a Fullstack Developer using React, JavaScript, and Tailwind CSS for the frontend, Node.js for the backend, and MySQL as the database.
- **FelloX Spin** - FelloX Spin is a roulette-based platform that enables users to win prizes through a spinning mechanism integrated with a scanner via the FelloX application. I contributed as a Frontend Developer using React, Next.js, and Tailwind CSS.
- **Satu IDesa App** - Satu iDesa is an integrated digital platform that provides access to village-related services, information, and community activities. The application aims to improve accessibility to public services and support local economic and social development. I worked as a Fullstack Developer using React, JavaScript, and Vite for the frontend, Node.js for the backend, and MySQL as the database.
- **DigiXplatform** - DigiXplatform is a digital solutions web platform developed in collaboration with Nexilis (EasySoft) and Telkomsel. I served as a Fullstack Developer, building the frontend with HTML, JavaScript, jQuery, and Bootstrap, and the backend with native PHP, supported by a MySQL database.

IT Staff - PT Alchemo PTE. LTD. **Jul, 2022 – Feb, 2023**

- **Analyzed downtime data and monitored hash rate performance for each mining machine**, identifying patterns, diagnosing issues, and ensuring optimal operational efficiency across all units.
- **Configured and managed IP settings for mining machines**, ensuring stable network connectivity, proper communication between devices, and minimal disruption to mining operations.
- **Prepared comprehensive reports and continuously tracked operational data**, providing clear insights and updates to the team to support decision-making and improve overall system performance.

IT Developer - PT Temadata Rekayasa Digital **Feb, 2021 – Jul, 2022**

- **KOL Mall** - KOL Mall is an e-commerce web platform similar to Tokopedia, designed to facilitate online buying and selling between users and merchants. I worked as a Fullstack Developer, developing the frontend using Vue.js and the backend using Laravel, with MySQL as the database. The platform includes features such as product management, shopping cart, order processing, and user account management. It is designed to ensure scalability, efficient transaction handling, and a seamless user experience across the platform.
- **Nimfa Live** - Nimfa Live is a live streaming platform that enables users to broadcast and watch real-time video content. I worked as a Frontend Developer, utilizing Laravel and Nuxt.js to build a responsive and interactive user interface. The application uses MySQL as the database to manage user data, streaming sessions, and related interactions. The platform is designed to deliver a smooth live streaming experience with a focus on performance, usability, and real-time engagement.
- **Republic Me** - Republic Me is a web-based platform for game top-up services, allowing users to purchase in-game credits and digital items quickly and securely. I worked as a Frontend Developer, building the user interface using Vue.js, while collaborating with a backend built on Laravel and supported by a MySQL database. The platform focuses on delivering a fast, user-friendly experience with efficient transaction flows and reliable service availability.

IT Staff (Internship) - PT Hexindo Adiperkasa Tbk. **Jul, 2019 – May, 2019**

- **Supported IT operations and performed troubleshooting across systems and infrastructure,** identifying technical issues, analyzing root causes, and implementing effective solutions to ensure system stability, minimize downtime, and maintain optimal performance across all operational environments.
- **Assisted in system maintenance and provided technical support,** performing routine checks, resolving technical issues, and ensuring the reliability and smooth operation of applications and infrastructure across the environment.
- **Assisted in developing web-based platforms,** contributing to feature implementation, debugging, and code optimization while collaborating with the team to deliver scalable, reliable, and user-friendly applications.

EDUCATION

Bachelor of Science in Computer Science

- University: Kalbis Institute
- Graduated: Des, 2020
- Organization: Member of HIMIF(Himpunan Mahasiswa Informatika) Kalbis Institute

---

SKILLS

- **Front-end Development**:
  (HTML, JavaScript, TypeScript, CSS, ReactJs, VueJs, Bootstrap, Tailwind CSS, Vite)
- **Back-end Development:**
  (PHP, NodeJs, Laravel, ExpressJs, CI)
- **Version Control System:**
  (Github, Gitlab, SVN)
- **Database Development:**
  (MySQL, PostgreeSQL, SQLlite, Oracle)
- **Software Debugging**
- **Problem-solving**
- **Responsive Web Design**
- **Quality Assurance**
  (Manual Testing, API Testing)
- **API Development**
  (REST API)

CERTIFICATES

- Technopreneur (05/2017) Biro Pengembangan Inovasi dan Kewirausahaan (BPIK)
- Gamepreneur (05/2017) HIMIF Kalbis Institute
- GIT Career at Bank Mandiri (08/2020) PT Bank Mandiri Tbk
- Create Website Responsive (09/2020) Impact Byte
